Work Data Engineer

Rihal - Data Migration and Services · Custom SaaS solutions provider.

Apr 2025 – Present

Remote, Muscat, Oman

- Developed a data lakehouse integrating heterogeneous data from 600 government and private entities across Oman's GDP-critical sectors into a centralized auditing platform (Go, MinIO, Keycloak, Vite, shadcn/ui, ML components)
- Building CI/CD pipelines for existing projects and laying the groundwork for future projects based on the organization's core stack.

Systems Engineer

Hifi Engineering Inc. · Pipeline monitoring company providing real-time leak detection via fiber-optic sensing, IoT data pipelines, and machine learning.

Jan 2020 – Oct 2024

Calgary, AB

- Reduced AWS costs by 82% (\$192,000) with logic and stack optimizations.
- Built ML pipeline for analysis, training, and deployment across 100+ servers.
- Streamlined cleaning, computation, and storage of large datasets including pipeline as-built measurements and high-frequency sensor data.
- Led a three-person team implementing CI/CD practices that improved deployment reliability and speed.

Developer

CTLT · Department of UBC that handles technical services accross faculties.

Sep 2018 – May 2019

Vancouver, BC

- Built an automation app adopted accross UBC to migrate thousands of courses between portals using APIs and Web scrapers.

Developer (Deliverable-Contract)

Mekar Srl · Custom HVAC solutions vendor undergoing digital transformation.

Apr 2024 – Present

Remote, Verona, Italy

- Automated generation of official project documents from dispersed data, replacing a manual process that consumed most of one employee's time.
- Developing RAG to automate customer QA.

Education University of British Columbia - Vancouver

BASc ECE

Aug 2014 – Apr 2019

Bachelor

Projects Clip Generator

Sep 2025 – Present

Finds and cuts highlights from longform content based on the speaker's A/V input and event timestamps fetched from game APIs

Awards

Codestacker Hackathon Winner

Awarded by Rihal - Data Migration and Services
Apr 2025

First place submission in solo hackathon - <https://github.com/galchammat/ghazi-rihal-codestacker>

Py Discord Code Jam 2024 Top 3

Awarded by Py Discord
Nov 2024

Third place submission in a team-based coding competition.

Jan 2026

Using Tailscale to connect machines running a Go daemon, SQL backup storage, GitHub Actions, and more.

Skills

Web Development

- HTML / JSX
- CSS / Tailwind
- Typescript
- GraphQL
- Go Fiber
- Py Flask

CI/CD

- GH Actions
- CircleCI
- Bash
- Ansible
- Terraform
- Docker

Networks

- SSH/SFTP
- VPC
- Tailscale
- Cloudflare ZT

Linux

- Ubuntu
- Dotfiles
- Bash
- System Administration
- Cron

AWS

- Kinesis
- Lambda
- S3
- IAM
- RDS / Dynamo / Timestream
- Cloudformation

Databases

- SQL
- MongoDB
- Redis
- Data Modeling

Observability

- Grafana Loki
- LogDNA
- Sentry
- SendGrid
- Webhooks

Languages

English

Native speaker

Interests

Computer Vision

- YOLO
- PaliGemma

Productivity

- nvim plugins
- steveyegge/gastown
