Work **Lead Data Engineer**

Rihal - Data Migration and Services

Apr 2025 – Present

Remote, Muscat, Oman

- Consolidated 600+ government and private datasets into a centralized data lakehouse, enabling cross-sector analytics and governance insights previously impossible.
- Automated ETL pipelines, reducing data processing time by 70% and freeing the equivalent of 3 FTEs of manual effort.
- Designed CI/CD and infrastructure patterns that scaled services reliably for future multi-team expansions.

Senior Systems Engineer

Hifi Engineering Inc.

Jan 2020 – Oct 2024

Calgary, AB

- Reduced cloud costs by 82% (~\$192k/year) by optimizing service architecture and eliminating redundant infrastructure.
- Built a distributed ML pipeline across 100+ servers, accelerating model training and deployment by 60%.
- Introduced CI/CD pipelines and monitoring practices that cut production incidents by 45% and improved deployment frequency.

Software Developer

CTLT, University of British Columbia

Sep 2018 – May 2019

Vancouver, BC

- Automated cross-faculty course portal migration, saving thousands of manual work hours and eliminating manual errors in course data.

Developer (Deliverables)

Mekar Srl

Apr 2024 – Present

Remote, Verona, Italy

- Automated document generation processes, eliminating manual work and accelerating delivery for client operations.
- Implemented a retrieval-augmented QA system to automate customer support for product inquiries, reducing response time by 80%.

Education **University of British Columbia**

Electrical & Computer Engineering (BSc)

Aug 2014 – Apr 2019

Projects **Clin Generator**

Projects

Sep 2025 – Present

Automated highlight extraction and clipping from long-form content, improving workflow efficiency for content creators.

Ubuntu Dev Environment Provisioner

Jan 2026 – Present

Built zero-touch Ubuntu developer setup, enabling fresh installs to be ready for production-grade development without manual configuration.

Skills

Full-Stack Development

React TypeScript GraphQL

Go Flask

Cloud & Infrastructure

AWS (Lambda, Kinesis, S3)

Terraform IAM

CI/CD & Automation

GitHub Actions Docker

Ansible

Data Engineering

SQL MongoDB Redis

Data Modeling

Systems & Linux

Ubuntu Bash

System Administration

Languages

English

Native

Interests

AI / ML Experimentation

High-scale System Design
