Work Data Engineer

Rihal - Data Migration and Services · Custom SaaS solutions provider.

Apr 2025 – Present

Remote, Muscat, Oman

- Developed a data lakehouse integrating heterogeneous data from 600 government and private entities across Oman's GDP-critical sectors. (Go, MinIO, Keycloak, Vite, shadcn/ui, ML components)
- Building CI/CD pipelines for existing projects and laying the groundwork for future projects based on the organization's core stack.

Systems Engineer

Hifi Engineering Inc. · Pipeline monitoring company providing real-time leak detection via fiber-optic sensing, IoT data pipelines, and machine learning.

Jan 2020 – Oct 2024

Calgary, AB

- Reduced AWS costs by 82% (\$192,000) with logic and stack optimizations.
- Built ML pipeline for analysis, training, and deployment across 100+ servers.
- Led a three-person team implementing CI/CD practices that improved deployment reliability and speed.

Developer

CTLT · Department of UBC that handles technical services accross faculties.

Sep 2018 – May 2019

Vancouver, BC

- Independently designed and built an app that automated UBC's course portal migration, adopted by all faculties and saving thousands of man-hours.

Developer (Deliverables)

Mekar Srl · Custom HVAC solutions vendor undergoing digital transformation.

Apr 2024 – Present

Remote, Verona, Italy

- Automated generation of official project documents from dispersed data, replacing a manual process that consumed most of one employee's time.
- Developing RAG to automate customer QA.

Education University of British Columbia - Vancouver

BASc ECE

Aug 2014 – Apr 2019

Projects Clip Generator

Sep 2025 – Present

Finds and cuts highlights from longform content based on the speaker's A/V input and event timestamps fetched from game APIs. Features a distributed system hosting go daemon, sql backups, gh actions runners, and a wails fullstack application.

Ubuntu Dev Environment Provisioner

Jan 2026 - Present

Dotfiles and an Ansible playbook (116+ tasks) that transform new Ubuntu devices into development-ready environments with zero manual intervention. Setup includes ssh key generation, and installation and config of gh, git, tmux, nvim with essential plugins, opencode, and other tools.

Awards

Codestacker Hackathon Winner

Awarded by Rihal - Data Migration and Services
Apr 2025

First place submission - <https://github.com/galchammat/ghazi-rihal-codestacker>

Skills

Web Development

- HTML / JSX
- CSS / Tailwind
- Typescript
- GraphQL
- Go Fiber
- Py Flask

AWS

- Kinesis
- Lambda
- S3
- IAM
- RDS / Dynamo / Timestream
- Cloudformation

CI/CD

- GH Actions
- CircleCI
- Bash
- Ansible
- Terraform
- Docker

Databases

- SQL
- MongoDB
- Redis
- Data Modeling

Networks

- SSH/SFTP
- VPC
- Tailscale
- Cloudflare ZT

Observability

- Grafana Loki
- LogDNA
- Sentry
- SendGrid
- Webhooks

Linux

- Ubuntu
- Dotfiles
- Bash
- System Administration
- Cron

Languages

English

Native speaker

Interests

Computer Vision

- YOLO
- PaliGemma

Productivity

- nvim plugins
- steveveyegge/gastown
